

User Acceptance Testing (UAT) Report

Date	2 October 2026
Team ID	SWTID-2026-6582
Project Name	PocketSmart AI: Your Smart Budget & Recommendation Assistant
Maximum Marks	

UAT Objective

Validate that the implemented PocketSmart AI application supports the required end-user workflows for authentication, planning, AI recommendation generation, budget validation, multimodal styling and history.

UAT Scenarios

UAT ID	Feature	User Action	Acceptance Criteria	Status
UAT-01	Register and login	Create account and sign in.	User reaches authenticated dashboard.	Pass
UAT-02	Home Planner	Submit budget and home requirements.	Personalized plan appears within validated budget.	Pass
UAT-03	Party Planner	Submit event details and selected services.	Contextual party plan and budget allocation appear.	Pass
UAT-04	Jewelry Planner - text	Submit jewelry preferences without image.	Jewelry recommendations appear.	Pass
UAT-05	Jewelry Planner - image	Upload valid outfit image with preferences.	Outfit analysis and coordinated jewelry recommendations appear.	Pass
UAT-06	History	Open saved recommendations.	Authenticated user can view/reopen stored plan.	Pass
UAT-07	Delete history	Delete a saved test record.	Record is removed.	Pass
UAT-08	Logout	Log out.	JWT cookie is cleared and user is redirected.	Pass

Acceptance Summary

The verified live end-to-end test exercised the complete workflow and passed. This UAT report records only verified application behavior; it does not claim a separate external customer survey.
