

Project Demonstration Plan

Date	2 October 2026
Team ID	SWTID-2026-6582
Project Name	PocketSmart AI: Your Smart Budget & Recommendation Assistant
Maximum Marks	

Project Demo Planning

Prepare a 5-minute end-to-end recording showing the working application and upload it to Google Drive with public-view access. Upload the project source to GitHub and include both links in the final submission.

Communication

Use a concise sequence: problem → solution → architecture → live Home/Party/Jewelry demo → Gemini + Python budget validation → testing → limitations/future scope.

Demonstration of Proposed Features

- Registration/login and dashboard.
- Home Interior Planner generation.
- Party Planner generation with guest/event context.
- Jewelry Planner text generation.
- Jewelry Planner outfit-image multimodal analysis.
- Budget totals and remaining savings.
- Generated marketplace/service search links.
- Recommendation history and logout.

Team Involvement in Demonstration

Team Member	Suggested Demonstration Responsibility
Jeevanandham S (Team Leader)	Project overview, architecture and final integration
Jayavigneshwara A	Home Planner and budget validation
Jeevapriyan S	Party Planner and search-link flow
Kaarthik Kishore G	Jewelry Planner and multimodal image analysis
Kalaiselvan N	Authentication, dashboard/history, testing and future scope

Scalability & Future Plan

Move to managed cloud deployment and PostgreSQL, integrate verified merchant APIs for live prices/availability, add caching and background processing, and extend the interface with multilingual/voice support and mobile clients.
